

A TURNING POINT IN NEW ZEALAND'S HISTORY!

DISCUSSION DOCUMENT

Time to Pandemic-Proof Our Country!

It is time to pandemic proof New Zealand's future, so in years to come future viruses will not impact our nation so greatly. Who would have thought an invisible virus could grind this nation to a halt so easily. Vision New Zealand is proposing a new vision for the future of this country. We are currently working on our new policy 'A Fresh Start for All New Zealanders' – here is a taster of what this will include:

Economic Reset

The evidence is obvious. We must now develop a stronger domestic economy, that is self-sustaining and self-determining, that has less dependence on overseas countries and outside influences.

As a nation we need to change how we trade moving forward. It's time to support Kiwi businesses more – and adopt a principle of 'From Kiwis, To Kiwis, For Kiwis!'

**FROM KIWIS,
TO KIWIS,
FOR KIWIS!**

Big, Bold Initiatives

Our big, bold initiatives will include getting more unemployed Kiwis into work, growing new regional initiatives, diversifying existing businesses into a local market and establishing manufacturing and production. Apart from the obvious economic benefits these initiatives will go a long way to pandemic-proofing our economy when a similar threat happens again. With Vision NZ's new National Security Reset (below), when our borders are shut down again (as quick as a phone call) our economy will continue to operate as normal while the rest of the world shuts down around us.

**HITTING THE
GROUND
RUNNING,
NOT LIMPING!**

We see the need for a rebuild and reset of the New Zealand economy, mostly because of Covid-19, but also because we need to take positive leadership in an economic upheaval and rebuild a positive economy that's going to ease the burden and the stress of debt, loans and loss - **so we can restart in asset not deficit, hitting the ground running not limping.**

Nobody wants to be working for years deep in the red. We believe a measure of debt and loan forgiveness is urgently needed across this nation. There also needs to be an overhaul of our tax system (including GST, income tax), business compliance costs, rates and leases. We don't believe throwing more money into the system is healthy. It could cause inflation, high costs of living, and debt.

**DEBT & LOAN
FORGIVENESS
FOR ALL!**

Taking on more debt to pay debt is dumb. We need to tip the economic scales in our favour for long term generational wealth building for our families and businesses.

National Security Reset

The Covid-19 pandemic has revealed the very poor state our National Security is in. With the lessons from Covid-19 we know for a fact that more than 90% of infections came through our loosely monitored border!

Our immigration and border controls are in dire need of a reset and restructure. The damage done by the Labour-NZ First-Greens Government has almost wrecked our island paradise, not to leave the National party out of the firing line either. Successive government's open border policies have been destructive.

Big, Bold Initiatives

Vision NZ proposes to shut down to ZERO all immigration and further refugee intakes for 24 months, at which time this will be reviewable.

**WE WILL KEEP
THE BORDERS
CLOSED!**

We need time to address the post-pandemic rebuild, fix our failed infrastructure development, along with our domestic economy, housing, and employment to name a few. We cannot continue the open border, globalist, immigration policies any longer.

We will seek to take advantage of our beautiful island paradise isolation (being surrounded by water) to build a more secure border, restrict all international visitors to high standards of testing and heat checks before entry at all airports and ports. There will no more backpackers, tourists or temporary visas for students or migrants for a 24 month border closure, until further reviewed.

**ZERO
IMMIGRATION
ZERO
REFUGEES
(FOR 24 MONTHS)**

We will ensure there is far superior monitoring that takes place at our border, including infrared screening, purpose built quarantine zones and more. We will create a pandemic free country where NZ Citizens know they are safe and secure within their own borders.

Kiwis need to be looked after first, before we attempt to look after non-Kiwis!
#KiwisFirst!

We will strengthen our military, to ensure we have greater capacity to continue guarding our borders, including purchasing additional Navy destroyers, and Airforce fighter jets.

We will need to protect our borders from the threat of predatory countries and fleeing pandemic contaminations via air and sea.

A Citizenship Reset

Vision NZ sees the need to reset and overhaul a deficient, irresponsible citizenship policy that's been an embarrassment to the rest of the world. This pandemic has taught us that we do not have a good handle of who is coming and going in this nation, and how to quickly locate and monitor non-citizens movements when necessary.

We believe there will be more virulent and deadly viruses in years to come. Hence our new pandemic-proofing immigration policy will be essential. New Zealand has long been vulnerable, and seen as an easy hit, with very little incentives or efforts to achieve long term citizenship in this country.

Big, Bold Initiatives

Vision NZ believes loyalty to one's country is vital. A New Zealand Citizen must have a love for our Flag, Freedoms, Faith and Family. If an individual chooses to not be a citizen, taking our revised Oath of Allegiance to this beautiful paradise, then they need to reside in another country where they can bestow loyalty. If an individual is not loyal to our country, they will not protect and preserve it - this means it's environmentally and economically easier to abuse. This has been evident by the behaviour of some foreign nationals lackadaisical attitude in New Zealand during this pandemic.

**LOYALTY TO
NEW
ZEALAND
IS VITAL**

We don't believe temporary or permanent residents (as they do now) should vote or have free access to an already overburdened health system, state welfare, or different funding streams and perks. Two of our biggest DHBs, Waitemata and Counties Manukau have 37% and 45%, respectively, as immigrant patients – this is burdening our most essential medical services. This is a huge cost and burden on the tax-payer and the system, not to mention, housing, employment and parallel social structures – all of these have a long term detrimental effect socially.

**CITIZENS
VOTE,
RESIDENTS
DON'T!**

**LET'S LOOK
AFTER OUR
OWN FIRST!**

The increasing overcrowding and stressing of our services is marginalizing Kiwis, particularly Māori, in their own land.

KIWIS FIRST!

We intend to create a Citizen's Register, and overhaul the current Citizenship process. All residents will be given an amnesty period of 24 months to seek citizenship if they want to continue making New Zealand their home. With this Citizen's Registrar, it will assist us to know exactly who applies for the benefits of citizenship and when catastrophes arise we will be better equipped to safely secure New Zealand.

Keep your eyes and ears tuned to this full policy coming soon – 'A Fresh Start for all New Zealanders'. If you'd like to offer your feedback or support, we'd love to hear from you. Please go to www.vision.org.nz to contact us!
